

Perthera's Subha Madhavan, PhD, to Speak at Prestigious Health 2.0 Conference

McLean, VA September 26, 2017 --(PR.com)-- Perthera Inc.'s, Subha Madhavan, PhD, Chief Bioinformatics Officer, will be speaking at the 11th Annual Fall Conference of Health 2.0 on Healthcare Innovations, Oct 1 - 4 in Santa Clara, CA, in the Personalized Health Track "Turning Data into Value."

Dr. Madhavan will present a key component of the Perthera Report™, Perthera's every-patient, real-time virtual tumor board technology, and how technologies such as this bring faster, more accurate and highly cost-effective tools to medicine. "I'm extremely pleased to be speaking about this rapidly evolving topic to such a prestigious global audience as Perthera continues to develop technologies and products to advance precision medicine through our Therapeutic Intelligence Engine™," said Dr. Madhavan.

Dr. Madhavan is an invited speaker at the Health 2.0 Conference which is aimed at providing a better understanding of how big data in precision medicine can translate into value for both the patient, the caregiver and the hospital.

Dr. Madhavan (pictured above) is a world-class leader in bioinformatics, data science, clinical informatics and health IT with responsibility for initiation, design, and execution of several large national and international biomedical research programs.

About Perthera, Inc.
